

# S.S. MINNOW

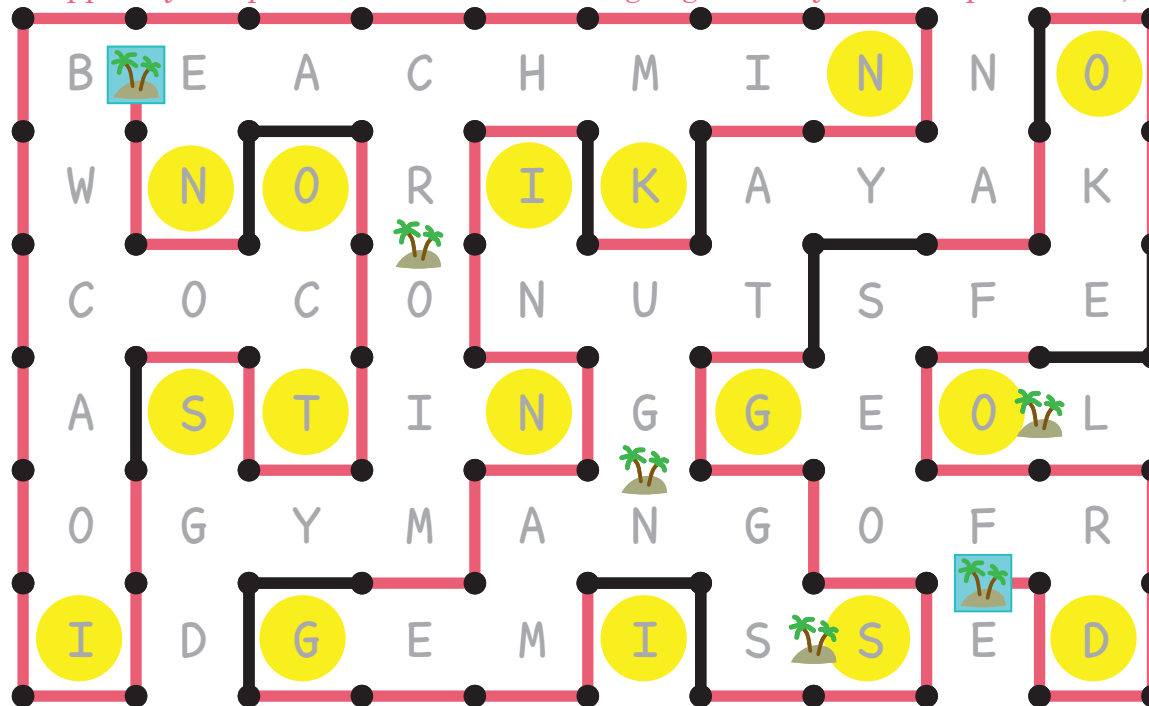

Draw a path to determine the route taken by the S.S. Minnow and which island became the castaways' home.

- Start at the island in the shaded box (upper left).
- End at one of the islands – which one is for you to determine!
- The path may not visit any other islands.
- Visit every dot exactly once.
- Travel horizontally or vertically between dots.

*Tip:* Make sure you understand the logical deductions illustrated in the Example on the right.

When you have completed the path, follow it from beginning to end and read the letters where the path wraps around three sides. This will answer the question: What did the Skipper and Gilligan say to the passengers to comfort them after their experience navigating the storm?

The letters wrapped by the path on three sides are highlighted in yellow. In path order, they spell:  
NOT  
SINKING  
IS GOOD
