

The Skipper is a bit paranoid about encountering hostile natives. Thus, when there are unexplained happenings, he often jumps to the conclusion that head hunters are responsible.

Help the Skipper find the missing “heads” for the sets below. In addition to losing their heads, each set has also lost a word. Fortunately, they are not missing, just misplaced.

The misplaced words – when reunited with their sets – will help you select one letter from each of the “head” words to discover what the Skipper is bringing to the December 14 celebration.

The “head” for a set is the word that can precede each word in the set. Numbers with each misplaced word specify the index into the “head” word. The answer is: **TIKI STATUE**.
